

We Hope you Enjoy the added features of the Advent Next Generation Integrated Navigation System.

For your safety, please do not operate the system while driving.

This Quick Start Guide describes the features, uses, settings etc. of the Navigation System, see the vehicle owners manual for the car audio system. A complete Navigation manual can be downloaded at www.adventproducts.com.

Due to continuous improvement, design and specifications may change without notice.

System Selection

Switching between the OEM system and the interface can easily be done several ways.

- 1: Press Next on the Screen to scroll through the Menu Options pages.
- 2: You can select the Navigation / Media interface by pressing the source button on the radio for 2 seconds at any time (see below).

Interface Home Page

The Main menu page of the interface contains the choices for Navigation, HDMI, Aux in, and ODB vehicle information and System Settings.

Navigation

Touch the Navigation Icon to enter the IGO map. Please refer to the IGO map quick start guides for user instructions.

Navigation Path

The Navigation Path page is used only for maintenance when an update is done. Use caution: Changing settings here could cause your Navigation to stop operating. If this screen appears when starting the navigation application, make sure that Automatically Run GPS is checked, and then press RUN GPS. This can take up to 1 min. for the Navigation software to re-load. If your GPS does not start correctly contact customer service for support.

Autorun Navigation software: Select To start Navigation without seeing this menu each time.

Browse: Browse will allow you to see the files and contents of the Navigation Memory folder.

Navigation Path Selection

This screen will allow you to select the correct file to run the navigation application. The System is preset from the factory and this should not be changed unless you are instructed to do so by Tech Support personnel. Selecting the wrong file could stop your Navigation unit from operating correctly.

HDMI

The HDMI input will allow you to view your compatible* smart phone's screen or any other device with a HDMI output on your Entertainment Systems screen while the vehicle is NOT moving. This input does not offer control of the connected device, only the image and audio are accessible FMVSS and Local laws do not allow the viewing of video by a driver or in a position the driver may view while the vehicle is moving. The system will automatically black out the screen once the vehicle starts moving but audio will still be heard.

NOTE: You're Phone or other device may require a special adapter to view HDMI. Contact your Phone-dealer for information regarding these parts. If your device can be viewed on a TV with HDMI input then it will be viewable on your Media system.

Video: Once your device is connected touch the video button to start viewing.

Device connected, please tap Video Icon to enter. For your safety, please do not operate or watch video during driving.

This Page Intentionally Left Blank

OBID Information

The OBID information page displays information from the vehicles "On-Board Diagnostic" system. This page provides selected data from that system that you may or may not see in other menus depending upon your vehicles options. This data selection cannot be changed. This information is only for reference.

System Settings

While in the Interface menu the "System Settings" page allows you to make changes in the Interface only. For Entertainment system or vehicle settings use the Settings Selection in the main Radio Menu page. Instructions for those settings are covered in your factory vehicle Owner's manual.

GPS Voice: Selects On/Off for Navigation Voice Prompts. **NOTE:** Navigation Volume is also controlled in the Navigation Mapping Application.

GPS Vol. Level: Selects the main system Volume for GPS prompts.

Temp: Selects Temp Display in F or C.

Rear Camera Settings: If no camera is installed this will cancel the switching to the Camera input. Select OFF if no camera is installed.

Rear Camera Option: Selects Aftermarket or OEM Camera Input.

System Settings

System settings continued:

System Update: Only used when a Interface System Update is issued.

System Reset: Resets the system to factory default settings.

System Language: Select the Language of your choice for the interface Menu pages. Navigation Language may be selected in the Navigation Application.

System Info: Provides Licensing and software version #'s.

Speedometer Display: Changes the OBD Data display from Miles to Kilometers.

System Settings

System settings continued:

Fuel Unit: Changes the OBD Data display from Gallons to Liters.

Time Format: Selects 12 or 24 hour clock display in the Interface system.

AUX

AUX input allows the use of any media player with an audio output. Connect your media player using the appropriate cable and select AUX to listen to the audio. Control of the media player is not possible through the interface.

USB Connection

NOTE: The USB connection added for your interface will provide charging for a connected device. The USB is NOT used for AUX in or Media playing. The USB Connection is also used for the updating of maps covered in the Navigation QSG. The interface will not play Media, Video, or pictures from any type of USB stick or other USB connected device.

Please check the AUX and related connection.
